Profile

Built a market intelligence pipeline that scraped, classified, and segmented 4,949 LinkedIn job postings across 10 countries — independently, from research question to deployed live tool. At SocialBeat, delivers monthly competitive intelligence and performance analysis for enterprise clients across FMCG, retail, luxury, and apparel verticals. Applies Python, NLP (TF-IDF, NMF), and AI-native workflows to produce intelligence a decision-maker can act on, not just report on.

Experience

Strategic Accounts Management Specialist

Oct 2025 – Present

SocialBeat, Chennai, India

- Delivered competitive intelligence and industry trend monitoring across four enterprise accounts (FMCG, retail, luxury, apparel), surfacing positioning shifts and optimisation opportunities in monthly senior-stakeholder reviews.
- Produced monthly KPI reports covering social media metrics, paid media ROI, and campaign performance — primary analytical output for senior client review across all four accounts.
- Grew combined Facebook and Instagram following by 1.25M+ over 11 months; managed Meta paid campaigns delivering 800M+ audience impressions across client verticals.

Associate Researcher

Feb 2025 – May 2025

OILab, University of Amsterdam, Netherlands

- Co-authored research poster *Follow the Memes* (University of Amsterdam) — built end-to-end NLP and image analysis pipeline (TF-IDF, NMF, Louvain community detection, Google Vision API) on large-scale discourse data.

Digital Marketing Intern

Jul 2022 – Jun 2023

Chennai Super Kings, Chennai, India

- Executed digital marketing and audience engagement operations for Chennai Super Kings (15M+ social followers) across a live IPL season — tracking content performance and coordinating campaign delivery at scale.

Projects

AI Adoption in Marketing Analytics Hiring — Market Intelligence Project

GitHub | Live demo

- Completed an independent market intelligence project analysing AI-adoption industry trends across 4,949 LinkedIn job postings (10 countries, 6 analytics job titles); findings replicated on a 3,897-posting temporal scrape (September 2026).
- Applied TF-IDF, NMF topic modelling, and skill co-occurrence network analysis — three independent methods converging on the same AI/non-AI segmentation boundary; TAM/SAM/SOM market sizing by country and seniority; delivered via 8-page Power BI dashboard.
- Deployed findings as a live job-description scoring tool (Hugging Face Spaces) — scores any JD against 6,023 TF-IDF terms to estimate AI-signal intensity.

VCT Masters London 2026 — Analytics Dashboard

Live dashboard

- Built an 11-page Power BI dashboard covering player rankings, team performance, match win probability, and Swiss-stage simulation — entirely self-directed.
- Data pipeline: scraped 318 matches and 8,210 player-map rows using Python (BeautifulSoup, Requests, Pandas); custom ELO system, DAX measures, 10,000-run simulation.

Education

MA in Cultural Data and AI

2023 – 2025

University of Amsterdam, Netherlands

BA in Communication and Media, Psychology, and English

2019 – 2022

Christ (Deemed to be University), Bangalore, India

Skills & Tools

Analytics & BI

Power BI (DAX, Power Query, custom themes, Publish to Web), Python (Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, BeautifulSoup), SQL, Excel

Market Intelligence

Market research, competitive intelligence, industry trend monitoring, segmentation, TAM/SAM/SOM sizing, dataset construction, stakeholder reporting

AI-Native Workflows

Claude (workflow integration, prompt engineering, RAG), HuggingFace transformers, TF-IDF, NMF topic modelling, Google Vision API

Certifications

- Anthropic Real World AI for Everyone Specialisation — Coursera, May 2026
- IBM Databases and SQL for Data Science with Python — Coursera, June 2026
