Shivnarayan Chella Raghavendran

Market Intelligence Analyst | Business Analyst · AI-Native Workflows
· Turning Market & Competitive Data into Decision-Ready Intelligence · Python · NLP · Power BI
Chennai, Tamil Nadu, India

Summary

Most analysts report on markets. I build the workflows that make sense of them. My background spans Psychology, Communication and Cultural Data & AI. I design AI-native analytical pipelines that collect large-scale market and competitive data, apply NLP and topic modelling, and produce intelligence a decision-maker can actually use. What I work with: Web scraping, Python, NLP, topic modelling (TF-IDF, NMF) Market sizing (TAM/SAM/SOM), competitive analysis, job market intelligence Power BI dashboards, stakeholder reporting, strategic recommendations Recent work: Analysed 4,949 LinkedIn job postings across 10 countries and 6 job titles to map where AI adoption actually concentrates in marketing analytics hiring — versus where it is just buzzword overlay. I currently work at SocialBeat delivering monthly analytical reporting to enterprise clients across Creative, Paid Media, ORM and Finance teams. Before that, I completed an MA in Cultural Data & AI at the University of Amsterdam, where I built computational pipelines for social media discourse research. Long term: I want to lead a market intelligence or business analysis function that treats AI-native workflows as the default, not a bolt-on. If you work in market intelligence, competitive intelligence, or applied analytics — connect.

Experience

Social Beat
Strategic Accounts Management Specialist
October 2025 - Present (1 year)
Chennai

Deliver monthly performance analytics to enterprise clients, coordinating across 6 internal teams (Creative, Paid Media, ORM, Design, Finance, Video)

Translate campaign and audience data into strategic recommendations for stakeholder review

Own cross-functional delivery tracking and client-facing reporting cadence

OILab

Associate Researcher

February 2025 - May 2025 (4 months)

Amsterdam

Applied TF-IDF, NMF topic modelling and Louvain community detection to analyse discourse patterns in 4chan image-board data

Built image analysis pipeline using Google Vision API; co-authored research poster Follow the Memes

Designed end-to-end NLP workflow from raw data collection to structured output for academic publication

Chennai Super Kings (CSK)

Digital Marketing Intern

July 2022 - June 2023 (1 year)
